Dear Friend,

Load-up, get ready to pull the trigger…

Because, with this arsenal of these 4 tools, you are going to find a surefire way to easily boost your search engine rankings and blow past your search engine competition with click-button ease!

Alone, each one is a powerful weapon to gain an advantage over your competition and flood your bank account with more cash, but, together, they are your ultimate weapon to gaining success on autopilot… because, with push-button ease, they do everything you need, including:

- **Instantly and effortlessly find the keywords** you should use for best results in your search engine optimization efforts to grab nearly all of the 10 rankings in your market,
- **Transform 15 minutes of effort into** dozens of one-way links, growing to up to hundreds,
- **Generate fresh, always-changing content** on every single one of your Web pages to boost your search engine rankings and send the search engine indexing spiders coming, ready to suck-up your Web pages.
- **And get immediate, detailed reports** of how your Web pages and competition are doing in your search engine battle to the top!

The bottom line is this… with these 4 tools, you can finally **get a nearly unbeatable edge over your competition** that they will have an extremely hard time matching.

Instead of being forced to get top ranking with massive amounts of difficult and painful work, struggling to get top rankings like your competition will have to if they want to compete, these four tools give you the edge you need, while saving you countless hours of time.

Let's talk about what each one gives you if you use it alone and what they are able to do together....

Sincerely,
Jeff Alderson

Tool # 1: Keyword Equalizer – Instantly Dig-Out and Sort Through Thousands of Possible Keywords to Use For Your SEO in Minutes – Ranked Best To Worst!

If you've ever struggled trying to decide which keywords you should use in your Web pages to improve your chances of getting top rankings, then you're going to love the amount of time this new tool saves you…

You won't have spend all your time digging through each search term and trying to find out how difficult it is going to be to beat the competition for each search term. Nope.

Instead, you simply type in a single keyword (or more if you choose) into Keyword Equalizer, then click a button. Then just watch as your new weapon digs-out thousands of potential keywords for your market and ranks them from best to worst.

No difficult or time-consuming research here. You can even have Keyword Equalizer sort through any list you've already generated on your own or with the Wordtracker.com database.

Think about it. How much time do you spend trying to figure out the best keywords for Search Engine Optimization? Probably, a good amount. Hours, if not days for each of your websites.

Now, with your copy of Keyword Equalizer, you can ***eliminate*** all that hard work and struggle.

Not to mention, you don't have to worry about trying to figure out which keyword you should use for your effort. Instead, Keyword Equalizer lays

out your keywords for you from best to worst using its "Amazing Magic Formula."

To get a full feel for what Keyword Equalizer can do, go-ahead, take a few minutes (just may be the most important ones you will ever take) and visit:

http://www.KeywordEqualizer.com right now!

Tie-In Hint: Before you begin your rise to the top of the search engine rankings, use your copy of Keyword Equalizer to find out which search terms you should optimize your Web pages for.

Then, once you find the keywords, this information is useful for two purposes:

1. On-Page Site Optimization – Where you include your keyword(s) inside your Web pages in the appropriate places. The main keyword you are targeting should go once in the <h1> tags, in the <title> tags, and in your copy. You may also include it in your <alt> tags of images.

2. As your anchor (or link) text – The links pointing to your site and the text on those links is the single biggest determining factor of how you page ranks. You should have your anchor text include your best keywords produced from Keyword Equalizer.

The tool Link Equalizer, described below, will show you an easy way to get those links to your site. But, before you can get links, you've got to know the best keywords you can target. With your copy of Keyword Equalizer, you're now able to find these keywords quickly and easily.

So, go-ahead and pick up your copy now by visiting:

http://www.KeywordEqualizer.com

Additional Note: If you're a Traffic Equalizer user, a volume 1 tool, then you can use Keyword Equalizer to effortlessly find out what keywords your pages should be targeted for… because it is a shame to waste your energy on using poor performing keywords when there is such profitable low-hanging fruit begging for you to grab!

Tool # 2: Link Equalizer – Instantly Get Dozens Of High-Quality, One-Way Links Flooding Into Your Site With About 15 Minutes Worth of Effort!

The single biggest factor in getting higher search engine rankings is having enough incoming links to your site and right link (or anchor) text on them. It is often **95%** of the determining reason as to how your Website ranks.

So, getting incoming links is vital for any Website to pull-in big profits from the search engines.

But, up until now, having lots of links was only possible for the big-guys. The small guys, like you and me, could never possibly hope to get flooded with huge numbers of links without a massive amount of work.

Your only options were to:

- Build huge reciprocal-link directories,
- Purchase expensive one-way links that cost an arm and a leg,
- Or write and distribute award-winning articles

With your access to Link Equalizer, you are now able to skip all of the hard-work and instantly get dozens of one-way links pointing toward your site almost immediately, and then watch as it builds up to potentially hundreds.

This means your site will be flooded with high-quality, one-way links and you did not have to spend hours working… or gobs and gobs of money.

This is your ultimate shortcut to getting your Web pages into the search fast and have them soar above your competition.

Owning this tool gives you the choice between being forced to go through months of endless work… or doing 15 minutes of thoughtless effort putting this tool in place, then waiting until the search engines uncover all of your new incoming links!

To instantly get highly-targeted, one-way links pointing to any Website of your choosing go-ahead and visit:

http://www.LinkEqualizer.com right now!

Tie-In Hint: Link Equalizer is your one-stop solution to instantly getting incoming links to your site so you can get into the major search engines and enjoy high-rankings in the shortest possible time! After you've developed your Websites with the appropriate Keywords using Keyword Equalizer and have found the right link text to use, then treat yourself to top-rankings with ease!

Tool # 3: RSS Equalizer – Add Fresh Content Directly To Your Web Pages, Boosting Their Page Rank and Calling the Search Engines Your Way!

The problem all Website owners have is this: As your Web pages age, the content on them becomes old and tired… and, as a result, the search engines are less likely to favor your Web pages.

You see, the search engines are after Web pages that are constantly updated. Whenever they find a page that is continually updated, then they boost its page rank and their indexing spiders come to your Website more often.

They love fresh content.

So, that's where RSS Equalizer comes in. This software fills each and every one of your Web pages (even if you have thousands) with constantly updated content.

You won't have to lift a finger. RSS Equalizer is your secret weapon to quickly and easily transforming dusty old Web pages, into fresh young pages full of new content… you did not have to create.

So, if you have any Website at all and you want to not only boost your search engine rankings for those pages, but keep them at the top, then you are going to *need* your copy of RSS Equalizer.

Of course, you'll get a few top rankings without RSS Equalizer, but why risk losing-out on the many more top rankings you could have…

And as a result, with RSS Equalizer, fill your bank account with significantly more cash.

What's even more: Many of your Web pages are just a few small improvements away from getting top 10 rankings (where you want to be to make serious cash with a search term)… and, finally, you can give each and every one of them the edge they need to get there.

In other words, you are leaving your money on the table that you could so easily have just by grabbing your copy of RSS Equalizer.

So, do yourself a favor, and see the many other features and benefits RSS Equalizer can offer you at:

http://www.RSSEqualizer.com

Tie-In Hint: RSS Equalizer is a great addition for all of your Web Pages to help make sure they get into the major search engines and boost their page rank – so they beat your competition with ease. After you've got your pages optimized with the right keywords from Keyword Equalizer, and you have incoming links from Link Equalizer, then this is the perfect addition to include in all of your Web pages for added cash-flow.

Tool # 4: SEO Spider – Track How Well Your Sites Are Doing In Your Search Engine Battles to the Top Quickly and Easily -- To Give You an Upper-hand Over Your Competition!

With your new copy of SEO spider in your hands, you now have your very own robot to scour through the Web, digging through every link and search term to report back to you on how your search engine battle to get top rankings is progressing.

It is like having your own reconnaissance spy to find out what your search engine competition is up to and determine how your Web pages are fairing. Without this new tool on your side, then you are left blind… and your only option is to do all this hard work yourself,

Including having to search for:

- Each and every page of your Website or your competitions',
- The number of pages indexed by Google, Yahoo or MSN
- Each pages' link popularity,
- Websites' Alexa Rankings,
- And Page rank statistics

But, with SEO spider, you get all of this vital information, required for serious success, in one, easy-to-sort place.

If you were to search for all of this information yourself… forget it. It would take you countless hours and many sleepless nights.

But, if you value your time (and who doesn't), then you need SEO spider to get all the detailed statistics you need, without all of the painstaking effort of finding it manually.

Just imagine what you can do with you new-found wealth of information. You now have what it takes to keep track of how your Web pages are doing so you know exactly what steps you have to take to get the top rankings you want.

Look: If one of your Web pages is just not performing (maybe it's targeting the wrong search term or does not have enough links coming), then you'll know right away that you should fix it.

Without knowing what's broken, then you could be losing-out on money that can be yours with a simple, few minute fix.

Not to mention, you can also spy on your competition to see what is and is not working for them… so you can avoid a steep learning curve in getting your site going.

So, if you want to get the inside scoop on how your Website is progressing on your search-engine battles to tap its massive amount of profit, then go-ahead and visit:

http://www.SEOSpider.com right now!

Tie-In Hint: Your SEO Spider allows you to get the information you need to figure out how you're progressing on the search-engine battle front. After you've got your pages optimized for the search engines, using the right keywords, have filled them up with fresh content, and have targeted one-way links pouring in, then you use your copy of SEO spider to see how you're progressing… and if any changes or improvements are needed.

Now, that we've covered how all 4 of these can be used to gain an advantage over your competition so huge they will have to spend months of endless work to match, let's do a quick recap:

Volume 2 **tools:**

1. **Keyword Equalizer** quickly and easily identifies the most profitable keywords for your search-engine optimization of each Web page, giving you the best possible chance to get high page rankings,

2. **Link Equalizer** instantly sends high-quality, one-way links pouring into your Website,

3. **RSS Equalizer** transforms dated pages with old content into ones with fresh, rapidly-changing content that search engines desperately want,

4. **SEO Spider** allows you to get the latest information on how your Websites are performing, as well as your competitions'.

Together all 4 of these tools give you a unique advantage over your competition they are going to have a hard time matching. While you are able to sit-back, relax, and rise to the top of the rankings, they're going to be spending endless nights plugging away at their computer.

And if you are looking for other tools to help create an autopilot online empire learn about…

Volume 1 tools:

1. **Traffic Equalizer** builds your Web pages for the search engines,

2. **Article Equalizer** gives you high-quality added content to add to the Websites you've created with Traffic Equalizer,
